

Our paint choice is
an enviro based decision

Five reasons to use Envirobase HP

- 1** Environmentally sustainable – Helps lower the carbon footprint of your vehicle's repair process without sacrificing the high quality of the finish.
- 2** Improved air quality – Dramatically reduces the volume of solvent vapours which are released into the environment.
- 3** Reduced waste – Substantially decreases waste by-products from the painting process.
- 4** Aligned to vehicle maker's paint technology – Today, the majority of the world's vehicle brands use waterborne paint application technology on the production line.
- 5** PPG peace-of-mind – Knowing that you are taking advantage of leading edge technology from the world's largest producer of transportation coatings.
